

ReXCarbon

ReXCarbon™ Carbon Tracking

ReXCarbon™, developed by ReXLytics, is a comprehensive real-time sustainability accounting platform that helps organizations track and report their carbon reductions resulting from hybrid/remote work and employee commuting activities. With a focus on Scope 3 – Category 7 carbon reduction offsets (Hybrid Work offsets and Employee Commuting), ReXCarbon™ provides accurate activity, offsets, and emissions integration with major regulatory carbon reporting platforms. By leveraging ReXLytics Telemetry Client agents, organizations can analyze and report on employee commuting and hybrid work activity in real-time. ReXCarbon™ supports all major emission factors and standards such as ISO, IPCC, GHG Protocol, GWP, and US EPA, making it a reliable solution for assessing Scope 3 Category 7 carbon reductions. Get ready for CSRD with ReXCarbon™.

FOCUSED SOLUTION

With a specialized focus on Scope 3 – Category 7 carbon reduction offsets, ReXCarbon™ provides precise reporting and seamless integration with major carbon reporting platforms, ensuring accurate measurement and assessment.

INTEGRATED CLIENT AGENTS

Leveraging ReXLytics Telemetry Client agents, ReXCarbon™ enables organizations to analyze and report on employee commuting and hybrid work activity in real-time, facilitating proactive carbon management strategies.

INDUSTRY STANDARDS

ReXCarbon™ supports emission factors and standards from prominent industry groups like IPCC and US EPA, ensuring reliability and compliance while assessing Scope 3 Category 7 carbon reductions, making it an ideal solution for sustainability initiatives.

Introducing the ReXLytics™ Platform, a revolutionary suite of solutions designed to empower organizations in the age of remote work. With ReXRemote™, gain unprecedented visibility into the digital experiences of your remote workforce. ReXExecutive™ provides real-time insights and strategy for hybrid work environments, while ReXHelpdesk™ revolutionizes customer support operations. With ReXCarbon™, organizations can track and mitigate their carbon footprints in real-time, focusing on Scope 3 – Category 7 carbon reduction offsets. Experience the power of the ReXLytics™ Platform to optimize remote work, enhance customer satisfaction, and contribute to a sustainable future. Elevate your organization to new heights with ReXLytics™.

The ReXLytics Platform is your go-to solution for unlocking the full potential of remote work. Gain comprehensive insights, optimize support operations, and track your carbon footprint in real-time. Embrace the future of work with confidence and success.

Experience the power of the ReXLytics Platform today. Contact us to schedule a personalized demo and discover how it can transform your organization.

ReXLytics - Empowering Remote Work Excellence and Sustainability.
